Title: Computer Fraud

Computer Tampering

Report of Investigation

Synopsis: To provide a summary of information developed to date in this private investigation.

Details: The following information was developed concerning the above-captioned case:

Introduction

I am a lawyer in California (license no. 237990), and I conduct private investigations pursuant to Business and Professions Code sec. 7522(e) and 7582.2(e). These statutes exempt attorneys from the private investigator licensing law.

I also represent V5 Systems, Inc. and its CEO Steven Yung as outside litigation counsel and personal counsel, respectively. Mr. Yung asked me for help with this incident, which I investigated in an effort to facilitate the filing of a lawsuit against the defendant and his new employer, as well as a report to the FBI due to the defendant's violations of various Federal laws against computer fraud.

To: FBI San Francisco From: Andrew G. Watters

Re: V5 Systems, Inc. V5-20200701

Incident Summary

V5 Systems, Inc. ("V5") manufactures artificially intelligent security cameras and similar products for a variety of U.S. and international customers. The company is currently in discussions with a private equity firm for a \$100 million acquisition, which would include V5's patent portfolio (example: patent no. 9,543,786 for a portable power system). V5's computers and computer systems are connected to the internet and used in interstate commerce.

In mid-June 2020, a senior employee of V5, Saeed Far, stole approximately 900 computer files containing proprietary technical data shortly before he departed the company. Then he deleted the data from the company servers, thereby denying access to the rest of the company. Both actions are violations of applicable civil and criminal laws, as well as the applicable employment contracts. Since early July 2020, Far has been claiming that he has been trying to return the data by re-uploading it, but his claims are inconsistent with the digital evidence. Also, he refuses to provide a screenshot substantiating his claims.

The missing data are elements of V5's patent portfolio, which has been valued at around \$80 million and is critical to the company's future. The data are believed to be in the possession of the employee's new employer, Gotion/Energy Port. Gotion is located in Fremont, California near V5. Attempts to contact Far have been unsuccessful in retrieving the missing data. The Fremont Police Department lacks a cyber capability and has no apparent interest in this case.

I am preparing a large civil lawsuit against Far and Gotion that will include claims for misappropriation of trade secrets and request injunctive relief, among other requests. Meanwhile, V5 requests assistance from the FBI in investigating this incident with a view toward prosecuting the offenders for the likely irreparable damage done to the company.

Detail

V5 CEO Steven Yung related substantially the following in telephonic interviews and via email:

Far was hired in 2017 as Vice President of Hardware Engineering. In that capacity, he had complete access to the company's proprietary technical data, although it is unclear how much work Far actually did for the company during his time with V5.

V5 uses Google Drive and Dropbox for circulating materials internal to the company. Far had access to this system, as shown in the attached log file generated by Google Drive showing exactly what he did and when.

To: FBI San Francisco From: Andrew G. Watters

Re: V5 Systems, Inc. V5-20200701

On June 9, 2020, Far and V5 mutually decided to end Far's employment, with his last day being June 30, 2020. The log of Google Drive accesses by Far shows that on June 16, 2020, Far downloaded approximately 900 files from the V5 Google Drive using an IP address that traces to Gotion (104.193.128.42). Gotion is a research and development company in Fremont that works on battery technology, much of which is directly applicable to the work V5 has done on power supplies and batteries for its security camera offerings. Gotion is the parent company of Energy Port, which is Far's new employer.

Over the last year, V5 has had financial trouble stemming from a bond funding that was supposed to close in Summer 2019, but which has been delayed and is still in the process of funding as of this report. As a result of those financial challenges, V5 has been unable to make payroll at various points and ultimately owes Far several tens of thousands of dollars in back pay. Yung believes that Far retaliated for the non-payment by deleting the company's valuable technical data files.

The Google Drive log also shows that Far downloaded and/ or viewed files from his home using his Comcast cable connection (73.231.211.99).

Since the files were discovered to be missing around July 7, 2020, Far has been claiming that he is re-uploading the files and that they are at various stages of completion. This appears to be untrue because the files are not reappearing on the Google Drive or Dropbox.

The loss of much of V5's technical data will certainly cause grave damage to the company, at great personal cost to numerous investors, because V5 will be challenged in terms of its ability to continue to build new products without ready access to the technical data and files.

V5 Vice President of Operations Jeff Smith related substantially the same information as Steve Yung.

V5 Sales Engineer David Barnes related substantially the same information as Steve Yung.

V5 Information Technology administrator Regie Anonuevo was in the hospital with COVID-19 and his prognosis is grave, therefore he was not able to speak with me.

V5 President Mazin Bedwan was unable to speak with me due to his schedule.

The defendant, Saeed Far, initially declined to speak to me about substantive matters. He initially referred all questions to his attorney, who he would not name and who he admitted has not been hired yet. When asked about the missing files, he initially said "there was no incident," and he instead asked me

To: FBI San Francisco From: Andrew G. Watters

Re: V5 Systems, Inc. V5-20200701

how he could get paid the money he is owed by V5. He was hostile and combative even during the brief call. Then he called back five minutes later and asked who handles investor relations for V5, because he is an investor and he wants to audit the company's books. I told him truthfully that I do not know who handles that and to ask Mr. Yung. He called back a couple of hours later and talked to me for 26 minutes, during which he made numerous comments about the missing files but said essentially nothing new. During the lengthy call, he explained that he was initiating an account recovery on Google Drive and that was 71% complete. However, he refused to provide a screenshot substantiating this. He refused to admit downloading the files from the new employer's computer network, stating he does not recall doing that. He refused to identify his new employer. then confronted him with the log files and told him he was lying, but he still would not admit downloading the files. Instead, he steered the conversation toward him being an investor and not wanting to harm V5 because it would harm him as well. He repeatedly asked whether he needed a lawyer, and I repeatedly told him that if I were him, I would hire counsel. Far then said toward the end of the call that he wanted to "throw out this statement and talk to my lawyer." I told him he could not take back what he had already told me, but that he was welcome to consult counsel moving forward. He did, in fact, retain counsel, Curtis Allen, Esq. of Redwood Shores. As of this writing, Mr. Allen and Mr. Far are reviewing my interview report and notes, and they say they will contact me with any corrections.

I analyzed the Google Drive log files and determined that more than 900 files were downloaded by Far on June 16, 2020 starting at 4:31 p.m. V5 is putting together a summary of what the files contained in order to assess the damage done by Far. Meanwhile, I am filing a civil lawsuit that includes injunctive relief to get Far to preserve and return the files.

Conclusion

Far has violated multiple provisions of the Computer Fraud and Abuse Act, 18 U.S.C. sec. 1030 et seq. Federal assistance is requested in resolving this case due to the complex cyber aspects of it and the lack of interest from the local authorities.

Lead 2:

Conduct interview of Steven Yung.

Date of transcription 07-28-2020

Steve Yung

On July 15, 2020, Steve found out that V5 was having access problems getting to the data on their cloud. Steve said he became aware through an email from his VP of operations stating that Saeed never uploaded the files back to the server or cloud after his departure as he had agreed to do. Saeed had promised to send V5 all the information back, but he did not do so and they never received anything from him. Saeed stated that he was not able to upload without risk of corrupting the files, or that the files were already corrupted, and that's why they couldn't be fully uploaded.

June 9, 2020 is when Saeed resigned from V5 Systems. Upon resigning, he was supposed to turn in all the information and data that he had been working on for V5 Systems. This incident is still ongoing—they have not been able to recover any information, but they are in the process of trying to recover the information from the various different providers like Dropbox and Google Drive. In order for V5 Systems to continue with their designs, they will need the data that is missing or they will not be able to continue working on various projects.

Saeed worked out of the Fremont office, but his actions affected the whole company. The exact locations that were affected were the Dropbox, Google Drive, and various cloud systems that the data was stored on. When IT went to look for the data where Saeed said it was, it had been deleted and downloaded elsewhere to an unknown location. Steve said he had only one interaction with Saeed since this incident: he called him to ask to return the data. Saeed did not respond to that inquiry, but simply stated to talk to his attorney.

Steve is the CEO of V5 Systems and he's also a

shareholder. He is in charge of trying to recover the data that was lost. Steve said this is the first time any incident like this has ever occurred. Steve said he believes Saeed did this partially out of revenge due to the fact that he was not getting paid by V5 Systems on time. Steve believes that's the main reason Saeed is doing this. Saeed has been employed at V5 from 8/1/16 - 7/1/20. Saaed had been receiving his regular pay from 8-1-16 to 8-15-19 for 3 years. Due to delay in V5's funding, on their books they owed Saeed back pay from 8-15-19 till 4-30-20. V5 resumed Saeed's regular pay on 5-1-20 till he resigned on 7-1-20.

However, from 8-15-19 to 7-1-20 (Saeed's resignation date). Saeed did not actually perform any work for V5 during that period stating that there was no work for him to do or could not perform any work at all because he didn't have engineers available. He was in fact consulting with another company called Energy Port which we found out from him only just prior to his resignation as he needed a good reference from V5 since Energy Port is a vendor to V5.

At this time, Steve said he's not sure if Saeed is sharing the data and information with other companies. Saeed keeps claiming that the files got messed up somehow and are stuck and will not fully download, which means they will not be able to be accessed. They use DropBox and Google Drive. They served as backups to each other. Saeed intentionally deleted data from both locations. Steve did mention one way to avoid this in the future would be to have alternitive backups or hard copies in case information is lost or deleted. That way they are able to recover it from somewhere else. It is almost 6 years' worth of information/data, and if it is fully lost it will cause the company great turmoil.

Jeff Smith

According to Jeff, senior VP of operations, Saeed was VP of hardware engineering. Saeed had been working for the company for about 3 1/2 years at the time of his resignation. Saeed was hired on to develop the next generation of hardware, but Jeff said he did not do so; in fact, he didn't even start at all in the 3 1/2 years he was there. Saeed essentially had done no work at all. He had been lying to everyone and giving false updates on work that was not being done. Saeed completely stopped working around six months ago, but stayed on payroll and was still getting paid, then in June he officially resigned with his last day of work being June 30th, 2020.

Saeed had spoken with Jeff in the beginning of June about how he could not complete his work, due to V5 not having enough employees. Saeed informed Jeff he had another offer at a different company and that he was going to accept it. That's when they decided his last day was going to be June 30, 2020. Jeff said that he had asked Saeed to give all the information and files to Regie in the IT department.

Jeff found out about the incident of Saeed erasing and not turning in the files about a week after his last day June 30, 2020 (around July 7, 2020). Jeff found out because V5 employee David Barnes contacted him saying V5 needed the files that Saeed took. That's when Jeff realized that Saeed had not given the files to Regie. Upon Jeff following up with Regie, they found out that not only had Saeed not turned in the files, but he also had deleted everything off of his account and deleted all the files from the V5 server, and downloaded them to a separate private drive. When Jeff reached out to Saeed asking why he had not turned in the files, Saeed said that they got deleted by something that the IT department did, and it was not his fault. Saeed said it might be in

connection with them deleting his V5 account.

Jeff consulted with his IT department, who informed him that what Saeed claimed is not even possible. Jeff said that since the incident, Saeed keeps telling Jeff that he's downloading the files but it is taking an extremely long time, and it's possible that all the files will be corrupted and there will be nothing there by the time the download is complete.

Jeff is unclear why Saeed took the files off of the Dropbox, but he does believe it's for two reasons: first, due to the fact that V5 had not been paying Saeed properly, and second, Saeed trying to cover up the fact that he had done no work for the company that he was hired to do and he was essentially stealing from them. This event has had a huge impact on the company because they are not able to move forward with any projects and cannot do any work without those missing files. If they are not able to recover the files, it would cost millions of dollars and would probably make the company go bankrupt. Saeed taking the files has affected every aspect of the company, not just the locations that Saeed worked at.

They are not 100% sure where Saeed did this from; he had access to the files from his computer, so he could have been at any location while he downloaded and stole the files. Jeff said he has dealt with and had to fire many employees over the last six years but has never encountered an incident like this. Moving forward, Jeff said he has learned to acquire all company files and property prior to employees leaving the company and before they are allowed to get their last paycheck. Also he learned that they should have multiple backups just in case of situations like this.

David Barnes

On July 28, 2020 I spoke with David Barnes at V5 Systems. He is a sales engineer for the company; he was formerly an IT Tech with V5 Systems as well. David said that he first became aware of this situation with Saeed at the end of June 2020 when Saeed stopped working for the company. David's understanding is that it was a mutual parting of ways. He first became aware through an email chain he was a part of. He did say that this incident is ongoing and they have not been able to recover the lost information from Saeed.

Saeed is saying that V5 Systems changed the passwords and this caused the loss of information, and that Saeed has been unsuccessful in trying to recover it. Saeed said the data may be corrupted and will not download past 50%, that's the reason he has not been able to give V5 the missing information. David worked in IT previously and said that the claims that Saeed has been making are false; there should be no reason the information got deleted and there should be no reason that the information should be corrupted or inaccessible.

David said he believes that Saeed is doing this out of spite for not getting paid by V5 Systems. Saeed is owed a lot of money that the company is refusing to pay due to their financial situation. This has not caused any lingering effects yet, but it will when they are ready to move forward on their projects. They will not be able to do so without that missing technical information. They are not entirely sure what exact information is missing. Saeed worked out of the Fremont office, but this incident affected all of V5 Systems in that no one is able to access the information on the cloud, which has affected all locations.

David stated he has never encountered this problem before

at V5 or anywhere else. David believes this can be avoided in the future by having better management, as well as paying their employees so there are no hostile feelings. He also thinks that one person should not have had all the power to begin with. Saeed should not have been the only one with access to that information.
